

City of Amarillo 2012 Training Series #19 *Educational Opportunity*

Panhandle Residential Foundation Manual

DESIGNED FOR: Contractors, Design Professionals, Home Builders and Inspectors

Program: Introduction of the 2012 Panhandle Residential Foundation Manual

Length of Seminar: 2 hours – **3:00 PM to 5:00 PM**

Experience Level: All levels

Description:

This seminar will assist participants in implementing the improved designs as detailed in the manual. The designs are a result of a collaborative effort between local Engineers, Architects, Construction Advisory Appeals Board and The Department of Building Safety. Emphasis on improved structural stability, sustainability, energy efficiency and specific designs for the soil conditions found in the Panhandle.

This is an excellent opportunity to interact with Professionals and Building Safety staff involved in this publication and application of those designs in the Built Environment.

Focus will be on the changes presented in the author's material with an opportunity for participants to discuss the improved designs.

Objectives:

Upon completion, participants will be better able to understand:

- Improved foundation and basement designs.
- Energy saving foundation designs.
- Soil maps and soil bearing capacities encountered in the Panhandle.
- Impact on design based on soil bearing capacity.

Cost: -----**FREE TRAINING!!!!**-----
